

FilmSaver™

FilmSaver™ is an anti-chaffing tape used to extend the life of greenhouse coverings. An engineered, nonwoven, white, 100% polyester fiber with a high-quality acrylic adhesive designed for the horticulture industry, RubberMill's FilmSaver™ helps to prevent premature film breakdowns due to abrasion and heat build-up.

FilmSaver™ has an easy-to-use self-adhesive liner that can be applied to all types of framework including metal, PVC and wood. In addition to its economical cost, FilmSaver™ provides the following advantages:

- Heat Reflective
- Excellent UV Resistance
- Excellent Abrasion Resistance
- Superior Insulation Characteristics
- Temperature Resistance -40° to +230° F
- Odor Free, Hypoallergenic
- Mildew and Bacteria Resistant

Availability:

- Standard Roll – 1.5” wide x 40’ long, (PN F700.250x1.50)
