Fibramat™

Fibramat™ is a designable, non-hazardous polyester product engineered as an alternative to fiber glass for accoustical, thermal and filtration applications. Fibramat is environmentally friendly and does not require the use of respirators, protective clothing and other safety precautions associated with the use of fiber glass. Fibramat's unique manufacturing process enables our technicians to formulate a product to specific requirements. Contact us for samples, technical data and recommendations for your fiber glass replacement needs.

FIBRAMAT™

- Excellent accoustical properties
- Excellent dimensional stability
- Good thermal properties and flame resistant
- Good abrasion resistance
- Excellent resilience and elasticity
- Excellent wrinkle resistance
- Non-absorbent
- Hypoallergenic
- Bacteria and mildew resistant
- Moldable with good breakage strength
- Strong fiber
- 100% recyclable
- Excellent fogging properties
- Odor free
- Color fastness
- Excellent wicking properties
- Thickness – 3 mm to 150 mm
- Widths – up to 2,000 mm
- Weights – 50 gsf to 260 gsf

FIBER GLASS

- Poor abrasion resistance
- Fair accoustical properties
- Harbors bacteria
- Poor resilience and stretch
- Non-absorbent – however, retains water and odor
- No affinity for dyes
- Non-recyclable
- Can cause skin irritation

On June 24, 1994, the Secretary of Health and Human Services (HHS) made it official policy of the United States Government that fiber glass is "reasonably anticipated to be a carcinogen." In the United States, fiber glass must now be labeled a carcinogen.
